Projects

USigns (2018)

Co-founded an ecommerce company that manufactures and delivers sign frames. Fully implemented the website which is the main point of sale.

Fortnite Tracker (2018)

Created an iOS and Android app using React native in order to track user stats on Fortnite, a battle royale game.

ESEA Rank Displayer (2017)

Created a chrome extension that's actively used that reduces the amount of work for CS:GO players to lookup stats on esea.

Telegram Bot (2016)

Created bot in Telegram chats to enhance conversations by providing new commands to users.

Info-Session Scheduler (2016)

Linux cron job script which connects to the University of Waterloos public API and updates subscribed user with events hosted on campus.

Twitch Muter (2016)

Chrome extension to automatically handle audio prioritization of multiple streams played simultaneously.

Appointment Scheduler (2015)

Online web application where people can create appointments to visit a patient. Appointments are then confirmed through text messages and shown on a public calendar.
