EMPLOYMENT

Web Developer, Intern   **Oneset**   **Summer 2015**
- Implemented front end UI for www.oneset.co
- Used Angular.js together with PostgreSQL to serve dynamic content
- Built responsive HTML/CSS with use of Twitter Bootstrap
- Implemented user friendly UX with use of animate.css and skrollr.js

Research Assistant   **University of Waterloo**   **Fall 2013 – Spring 2013**
- Assisted Professor Carol Fung in malware collaboration project
- Located and collected several hundreds of malware and false positive files
- Optimized simple tasks with scripts
- Formatted and manipulated files for efficient processing

EDUCATION

Waterloo, ON   **University of Waterloo**   **Fall 2014 – Present**
- Bachelors in Computer Science
- Participates in extra-curricular activities such as Hackathons (Penn Apps, Hack The North, SpartaHack, Kik Hackathon)

TECHNICAL EXPERIENCE

Projects
- **Tech Support** (2015 – Present). Currently in progress. A website where users can ask questions and receive support via real time messaging (built from scratch with socket.io).
- **Appointment Scheduler** (2015). Online web application where people can create appointments to visit a patient. Appointments are then confirmed through text messages and show on a public calendar.
- **Streaming Info** (2015). Static website where users can discover professional gamers (streamers) for Counter Strike: Global Offensive and League Of Legends
- **Riot Access** (2014). A website designed to simplify the Riot Games API. Done through a sleek and simple designed single paged application which allows users with no programming experience to retrieve data.
- **Flood-it** (2014). Basic game played through the command line created in C++ that makes use of design patterns.

Languages and Technologies
- C++; C;Scheme;HTML; CSS; Javascript
- Node.js;Angular.js; Mongodb;Linux shell; BASH Scripting; MEAN Stack; Git

Other Experience
- Created articles and videos for a tech company (cellpig). Was main source of technical support, helping users on a day to day basis with basic things like quality of products to advanced trouble shooting of applications
- Worked with local startup (sourced.fm) to help aggregate and gather information about musicians to build a data base. Set an example on how to quickly gather information.
